

## Customer Partners

“This is the best machine I have ever bought. In six years of continuous operation I haven’t had a single issue, with zero maintenance. The palletizer changes patterns with a couple button strokes, and we’re off and running.”

*John Welch, Metrex Research Corporation*

“By automating our palletizing and integrated stretch-wrapping operations, we have realized significant savings in labor costs and packaging materials costs, while increasing operations speeds. Manual palletizing had been a bottleneck for our production lines and an addition to our labor costs. We estimate that the equipment will yield a 1.7-year payback in terms of annual direct labor savings. We also have improved worker safety and reduced worker stress. TopTier has really done its homework regarding worker safety. All the moving parts of the equipment are locked into position mechanically and then verified by location sensors before we can open any of the access doors.”

*Alex Meszaros, Spectrum Brands*

“I believe that good people, good equipment, and good service deserve a good review. You will always get that from me. How do these numbers look. Over 3 million 50 lb packages each year enter the palletizer and have for over 6 years.”

*Ron Goldie, The Miniat Companies*

“After six years of 24 hour a day operations, 340 days a year, TopTier palletizers are the most reliable and easiest to maintain of the several palletizer brands we operate.”

*Paul Gallant, Cavendish Farms*

“The palletizer isn't as huge as some of these other machines, and TopTier was very willing to work with us. The machine is relatively simple and straightforward, yet it is quite well built.”

*Ralph Lindem, Watchtower Publishing*
